

**Have you ever wondered,
'why it is so'?**

**Are YOU a scientist of the
future?**

**National Science Week is coming to
Landsdale! Get involved. Be creative!**

Choose a Science topic that interests you. It doesn't have to be on the 2015 Science Week theme of 'Making Waves – the Science of Light'. It can be on any Science, Technology, Engineering, Arts and Mathematics (STEAM) theme.

SOME IDEAS

YOU COULD:

- ❖ Prepare, conduct and report on an investigation or **original** research
- ❖ Prepare a short (60 second) video to communicate a Science idea
- ❖ Prepare a Science Poster (Pre-Primary to Year 2 only)
- ❖ Invent or design something

TO ENTER THE SCIENCE EXPO DISPLAY, YOU WILL NEED TO:

- ❖ Let your teacher know if you want to join in by the **end of Week 1, Term 3.**
- ❖ **Follow the guidelines and rules**
- ❖ **Prepare an exhibit** where you display and talk about your work (electronic presentations are welcome too)
- ❖ **Be ready for the Landsdale National Science Week Expo in Week 5 on Tuesday 18 August.**

There are a few rules:

1. It must be your own work, although you can ask for some guidance from an adult (parents or teachers). ***You and your parents will have to sign a document stating it is your own work.***
2. **Be safe and ethical** (do not do anything that may be illegal, harmful to you, others or animals). Make sure you check with an adult that what you are planning is safe and suitable. Wear safety equipment if appropriate.
3. **We don't expect you to spend much money on materials** – try to use everyday items or recycled materials where possible.

NEED MORE INFORMATION ...?

Details will be provided in Week 1 of next term. If you really need some information in the holidays, you can email Mrs Marrion at Ella.Marrion@education.wa.edu.au
